RESEARCH INTERESTS

Bayesian inversion, non-stationary geostatistics, computer vision in geosciences

EDUCATION

Stanford University, Stanford, CA

Ph.D. in Geological Sciences, advised by Prof. Jef Caers. Sep 2017 - present

Peking University, Beijing, China

B.S. in Space Physics Jul 2017

B.S. in Applied Mathematics Jul 2017

Hong Kong University of Science and Technology, Hong Kong, China

Exchange program in Physics with full-tuition scholarship Dec 2014

RESEARCH EXPERIENCE

Ph.D. Candidate, Stanford University (Stanford, CA) Sep 2017 - present

- Data Science Scholar at Stanford Data Science Institute, 2020 - 2022 cohort
- Ph.D. candidate at Stanford Center for Earth Resources Forecasting

Research projects:

- Hierarchical Bayesian inversion of global variables and large-scale spatial fields
- Quantifying uncertainty of subsurface systems using multi data sources: geophysical data and geological constraints
- 3D geomodeling using computer vision methods: implicit level-sets method, semantic segmentation using deep convolutional neural networks (CNN).

Other data science for social good projects:

- *Urban inequality*: Measuring spatial-temporal change of physical conditions in neighborhoods with street view imagery
- *Agricultural monitoring and food security*: Semantic segmentation of crop type in Africa
- *Natural hazard research*: Landslides susceptibility assessment in California, reducing sampling bias of landslides by identifying unrecorded events from satellite images
- *Covid-19 study design*: Covid-19 Serology Study Design and Exploration

Technical mentor, Stanford Data Science for Social Good April 2021 - Aug 2021 (Stanford, CA)

- Quantitatively measuring physical aspects of urban neighborhood environments from street view imagery data using computer vision recognition tools
- Designing computer vision tutorials for student fellows
- Leading and advancing student fellows to achieve project goals

Data Science Intern, Total E&P Research and Technology Jun 2020 - Sep 2020 (Sunnyvale, CA)

- AI & Geosciences Program: based in Google Cloud Advanced Solutions Lab

- Developed a semi-supervised learning framework to optimize geophysical data interpretation with limit labels
- Active Learning to aid experts' geophysical interpretation

Guest Ph.D., Hydrogeophysics Group, Aarhus University Jun 2019 - Aug 2019
(Aarhus, Denmark)

- 3D modeling of geological structures given towed electromagnetic (tTEM) surveys: uncertainty assessment and quantification.

Research Assistant, Peking University (Beijing, China) Jun 2016 - Apr 2017

- Detecting the air pollution level (PM2.5) in Beijing using crowd-sourcing photos
- Precision Medicine: Drug Sensitivity Prediction

Research Intern, Stanford University (Stanford, CA) Jun 2016 - Sep 2016

- Functional Data Analysis with incomplete production data in unconventional reservoirs.

Research Intern, University of California, Berkeley (Berkeley, CA) Jun 2015 - Sep 2015

- Urban foraging's contribution to nutrition: correlation between urban foraging knowledge and demographic variables

TEACHING AND MENTORING	• Data Science for Social Good Program Technical mentor	Spring 2021 - Summer 2021 Stanford Data Science Institute
	• GEOLSCI 6: Data Science for Geoscience Co-designer/Teaching Assistant	Winter 2021 Stanford University
	• GEOLSCI 240: Data Science for Geoscience Teaching Assistant	Winter 2019 Stanford University
	• Data Analysis and Business Value Teaching Assistant	Spring 2017 Peking University
SERVICE	Graduate panelist for Stanford Earth IDEAL (Inclusion, Diversity, Equity, and Access) faculty search	2021
	Co-president in Association of Chinese Students and Scholars at Stanford	2019-2020
	Student Organizing Committee, Women in Data Science @ Stanford Earth	2019
HONORS AND AWARDS	Society for Industrial and Applied Mathematics (SIAM) Travel Awards	2021
	Stanford Data Science Scholars Program Fellowship	2020-2022
	GS Travel Fund 2021	2020
	Harriet Benson Fellowship Award	2020
	2nd Prize in Stanford Big Earth Hackathon	2018
	Meritorious in COMAP's Mathematical Contest in Modeling	2016
	Houston BAA Scholarship	2016
	Guanghua Scholarship	2014, 2015
TECHNICAL SKILLS	Dean's list in School of Science, HKUST	2014
	Languages: Python, R, MATLAB, C/C++	
	Deep Learning Framework: TensorFlow, Keras	
	Other Software: L ^A T _E X, Jupyter, Google Cloud Platform
